100K+ PyPI downloads | 3× hackathon winner — \$3.5K earned | 144★ open-source project — featured on Hacker News

AWARD-WINNING PROJECTS

- **Felt-1 — 3rd Place, WeaveHacks 4 | \$1K + TRMNL**
Built anchor-normalized neural similarity and contrastive scoring for an isoneural converter spanning image, audio, and text; developed multimodal experiments and agent failover across 45 commits. *TypeScript, Python*
- **Planelets — 1st Place, SuperPlane Hackathon | \$1,500**
Delivered a 1,600+ line Go plugin backend with runtime manifest discovery, typed configuration, actions, webhook triggers, caching, and tests; also shipped SDKs in four languages. *Go, TypeScript*
- **Zyma — \$1,000 CodeForCause Winner** — Shipped a client attendance platform in 12 hours with authentication and a reusable design system. *Next.js, Supabase*
- **Billion — Founder & CEO | 3rd Place, Congressional App Challenge 2025** — Built the content feed, scraping pipeline, and architecture. *TypeScript, React Native*

OPEN SOURCE REACH

- **100,000+ cumulative PyPI downloads** — Published and maintained aioudp, unmarkd, idae, pyt2, xclif, and git-worm.
- **rust-but-lisp — 144 GitHub stars, featured on Hacker News** — Built a Lisp-to-Rust transpiler that emits compilable Rust.
- **patchwork-cli** — Built an AST-native refactoring CLI for structural code edits using Rust and Tree-sitter, designed for agent-driven development workflows.

LEADERSHIP & ENGINEERING

- **Billion — Founder & CEO** — Founded and lead product and engineering for an award-winning AI-powered political information app.
- **FRC Team 3256 — Programmer, 2023–2025**
Implemented robot subsystems, 3D driver simulation, anti-tip controls, structured logging, and a Tauri scouting application; contributed to seven team awards including Creativity at World Championships.
- **VC Assist — CEO** — Lead a student-run nonprofit improving school infrastructure; built the full-stack platform and scraping systems, then directed a frontend rewrite for performance and usability.
- **VCSD Club — Founder** — Founded the school's software-development club, authored its curriculum, built its website, and shipped an interactive game that teaches REST APIs.

SELECTED ENGINEERING

- **Quillium** — AI-assisted nonlinear writing editor with revision history and annotations.
- **FADAIG** — Arduino USB-HID Word Hunt solver combining trie search with hardware automation.
- **Hologram** — Keyboard-first macOS photography culling workspace with RAW/JPEG and EXIF support.
- **LJV** — Real-time WebGL2 Lissajous music visualizer packaged as a Tauri desktop app.

SKILLS

Languages: Python, TypeScript, JavaScript, Rust, Go, Java, C++

Web: React, Next.js, SvelteKit, Tailwind CSS

Systems & Data: Supabase, PostgreSQL, SQLite, Docker, GitHub Actions, WebGL, Tree-sitter, Playwright

ADDITIONAL DISTINCTIONS

- **USACO Silver | picoCTF 2026: 174th / 8,747 | FRC: 7 team awards, 2024–2025**
- **Piano** (since 2017) — CM Level 10, State Honors; USOMC Intermediate Baroque, 3rd Place **Trombone** (since 2018) — Folsom Jazz Festival, 2nd Place
- **Creative production** — Composer; camera operator and live switcher; Final Cut Pro, Logic Pro, and Darktable
